

M1: Detection of rare species in clinical routine samples:

- *Alloscardovia omnicolens*
- *Anaerococcus prevotii*
- *Arcanobacterium haemolyticum*
- *Arcanobacterium hippocoleae*
- *Buttiauxella agretis*
- *Corynebacterium pilbarensense*
- *Dulosigranulum pigrum*
- *Dorea formicigenerans*
- *Eggerthella lenta*
- *Eikenella corrodens*
- *Empedobacter falsenii*
- *Erysipelothrix rhusiopathiae*
- *Gemella morbillorum*
- *Inquilinus limosus*
- *Neisseria bacilliformis*
- *Oligella urethralis*
- *Peptoniphilus duerdenii*
- *Propionimicrobium lymphophilum*
- *Pseudoxanthomonas kaohsiungensis*
- *Ruminococcus gnarus*
- *Staphylococcus pettenkoferi*
- *Staphylococcus argenteus*
- *Actinomyces urogenitalis*
- *Actinomyces turicensis*
- *Actinomyces neuii*
- *Actinomyces europaeus*
- *Actinomyces odontolyticus*
-
- *Acinetobacter baumannii*
- *Acinetobacter calcoaceticus*
- *Acinetobacter calcoaceticus-like*
- *Acinetobacter nosocomialis*
- *Acinetobacter pitti*
- *Acinetobacter seifertii*
-
- *Actinobaculum schaalii*
- *Actinobaculum massiliae*
-
- *Klebsiella variicola*
-
- *Streptococcus pneumoniae*
- *Streptococcus pseudopneumoniae*
- *Streptococcus mitis*
- *Streptococcus oralis*

- *Varibaculum cambriense*
- *Trueperella bernardiae*
